

Internet Hotspot Solutions for Church Bible Study

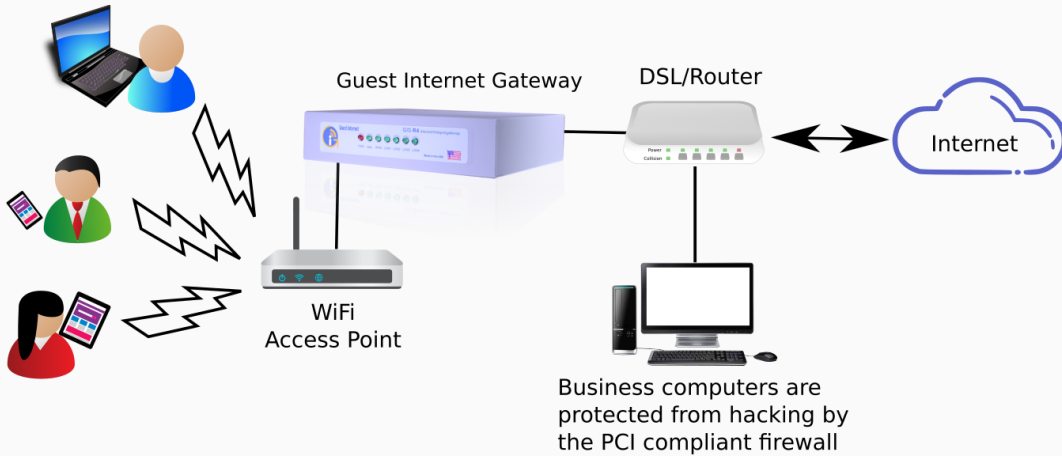

Wireless Internet access has become very popular with churches as a tool for Bible classes using online resources. Internet WiFi Hotspots in use by churches are a valuable resource for teaching, however they permit users to access any web site on the Internet.

Pastors can use GIS gateway products to restrict Internet access to the Bible study websites that are used for the classes. This is possible because GIS gateway products can be configured as a 'walled garden' limiting Internet access to only those websites that are permitted on the login page. Access to all other websites such as Facebook and Google are blocked.

Save money by using your Internet service efficiently. Determine which Internet sites your parishioners can access and block access to all other Web sites.

Ensuring that users access only the Web site that you want them to will save you money. Spend less on your Internet connection while having it used by more people.

Approved websites are shown on the login page as buttons: clicking a button takes the user to the website. We can help you to develop your own custom login page if required.

STUDY CLASSROOM

GIS-R4

- Gateway for several wireless access points
- Up to 50 concurrent users with laptops and smartphones
- 75 Mb/s throughput
- Options of credit card billing and P2P blocking

SMALLER CHURCH

GIS-R6

- Gateway for larger facilities that require multiple wireless access points
- Up to 100 concurrent users with laptops and smartphones
- 100 Mb/s throughput
- Options of credit card billing and P2P blocking

LARGER CHURCH

GIS-R20

- Provide a high performance Internet service
- Up to 500 concurrent users with laptops and smartphones
- Dual WAN throughput up to 200 Mb/s, with load balance and failover for high reliability
- Options of credit card billing and P2P blocking

We manufacture a range of hotspot products that offer the exact price / performance for any type of Internet business. Do you have special requirements for your Internet Hotspot? Our technical support staff will be glad to help you with a solution that meets your specific requirements. We can also provide a custom login page service based on your business web site. Please see our web site: www.guest-internet.com for product data sheets and manuals.
