

Internet Hotspot Solutions for Dental and Medical Waiting Rooms

It is becoming commonplace for dental and medical practices to offer wireless Internet in waiting rooms, for patients who bring their iPhones, iPads, laptops, netbooks and Blackberries.

Our products provide a simple yet extremely secure solution for any medical practice that wants to offer Internet for patients. Data theft risks from hackers and illegal file sharers are eliminated. Brand your WiFi Hotspot by creating a custom login page that links to your practice web site and advertises your services.

An Internet hotspot can put your practice at risk. Protect your patients information from hackers and data thieves.

Security	
	PCI compliant firewall: protects your business computers from data theft
	Virus and Trojan blocking which eliminates network performance problems
	Block illegal P2P downloads to avoid Internet service disconnection lawsuits
	Access control: generate pass codes with many duration and control options
	Track individual network usage and ban / restore abusive users
	Content filter: adult website blocking for a family friendly service
	Speed control: prevent data hogs consuming your bandwidth
