

Internet Hotspot Solutions for Schools and Colleges

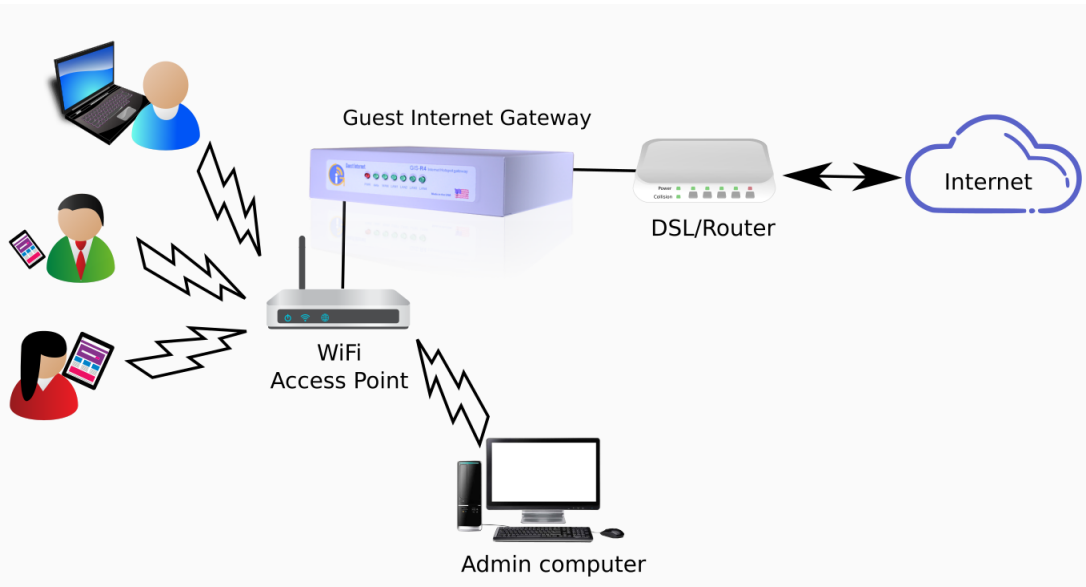

Although Internet access is a must for school curricula the service must be locked down with 'parental controls' that prevent students getting access to adult Websites, or Websites that promote content that is unacceptable within the school environment. Guest Internet gateways provide those 'parental controls'.

It is very important that the school can block peer-to-peer (P2P) file sharing software to ensure that the school is not held responsible for copyright infringement. Data download speeds are also regulated to share the Internet resources between all students.

The Guest Internet gateway protects students from the undesirable parts of the Internet, and protects the school when students try to share copyrighted material.

The school can use the Guest Internet gateway to control access to the Internet. Each student is issued with an access code that is tied to the students computer. The access code determines the time that the student can use the Internet. Reports also show each students Internet usage.

The school can also use the gateway custom login feature to prepare a home page for the school, and advertise events via the login page.

SMALLER SCHOOLS

GIS-R6

- Gateway for smaller schools having multiple wireless access points installed
- Up to 100 concurrent users
- 100 Mb/s throughput
- Peer to peer (P2P) illegal file share blocking
- Content filtering, block adult websites

LARGER SCHOOLS

GIS-R10

- Gateway for larger schools having multiple wireless access points installed
- Up to 250 concurrent users
- Peer to peer (P2P) illegal file share blocking
- Content filtering, block adult websites
- Failsafe operation, dual WAN throughput up to 100 Mb/s, with load balance and fail-over for high reliability

HIGH SCHOOLS/COLLEGES

GIS-R40

- Gateway for high schools and colleges having multiple wireless access points installed
- Up to 1000 concurrent users
- Peer to peer (P2P) illegal file share blocking
- Content filtering, block adult websites
- Failsafe operation, Quad WAN throughput up to 300 Mb/s, with load balance and failover for high reliability

We manufacture a range of hotspot products that offer the exact price / performance for any type of Internet business. Do you have special requirements for your Internet Hotspot? Our technical support staff will be glad to help you with a solution that meets your specific requirements. We can also provide a custom login page service based on your business web site. Please see our web site: www.guest-internet.com for product data sheets and manuals.
