

Internet Hotspot Solutions for Student Accommodation

Wireless Internet access is a 'must have' for student accommodations. However the Internet service must be carefully managed to prevent abuses.

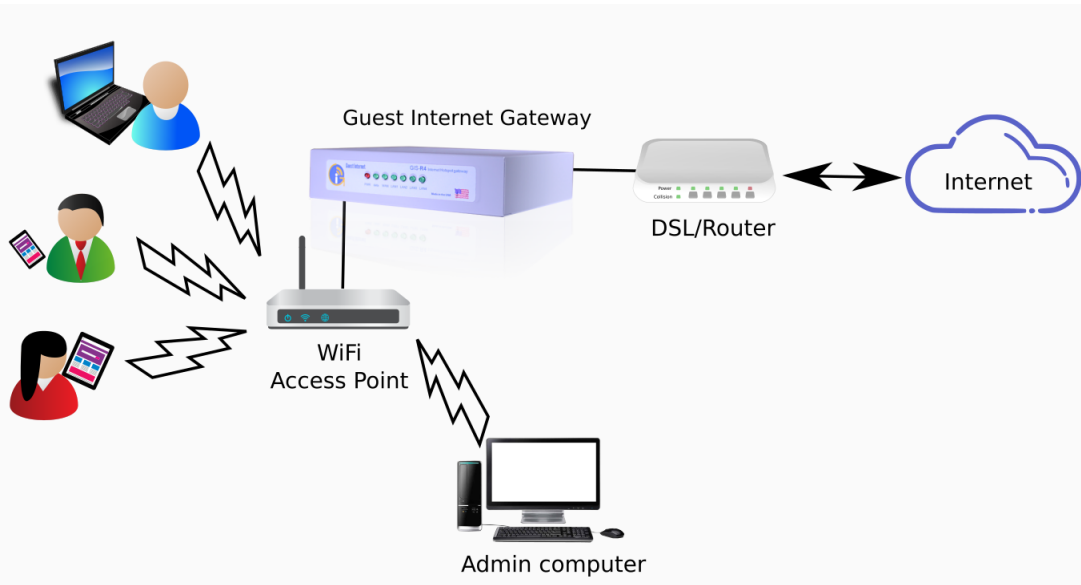

Wireless Internet is a resource that has to be shared by many students and imposing controls is the only approach to ensure fair use.

Several controls are essential for student accommodations. It is important to block peer-to-peer (P2P) file sharing software to ensure that the student accommodation management is not held responsible for copyright infringement. It is also necessary to regulate data speeds to share the resource between all students. Furthermore, depending on the student age groups, content filtering can also be applied to block adult web sites.

Solve the student bandwidth demand problem: give free Internet at a slow regulated speed and charge for high-speed access.

Use the gateway credit card billing feature to provide free regulated access and offer access without speed controls for up to ten time durations. Charge for the high-speed service using the PayPal® credit card processing service.

The login page tells students that the free Internet is a basic service and high-speed Internet can be purchased by clicking on the button.

STUDENT HOUSES

GIS-R4

- Gateway for use with one or more wireless access points
- Up to 50 concurrent users with laptops and smartphones
- 75 Mb/s throughput
- Options of credit card billing and P2P blocking

APARTMENT BUILDINGS

GIS-R6

- Gateway for larger facilities that require multiple wireless access points
- Up to 100 concurrent users with laptops and smartphones
- 100 Mb/s throughput
- Options of credit card billing and P2P blocking

HALLS OF RESIDENCE

GIS-R40

- Provide a high performance Internet service with access points that cover a large area
- Up to 1000 concurrent users with laptops and smartphones
- Quad WAN throughput up to 300 Mb/s, with load balance and failover for high reliability
- Options of credit card billing and P2P blocking

We manufacture a range of hotspot products that offer the exact price / performance for any type of Internet business. Do you have special requirements for your Internet Hotspot? Our technical support staff will be glad to help you with a solution that meets your specific requirements. We can also provide a custom login page service based on your business web site. Please see our web site: www.guest-internet.com for product data sheets and manuals.
