**Internet access is a deciding factor when 80% of guests choose a hotel.**

Guest Internet network gateway products are very popular for motel, hotel and resort IT infrastructure projects around the world, with installations in over 65 countries that serve guests with a reliable managed Internet service.

Guest Internet products ensure that a hospitality business provides the best possible Internet service for guests to ensure a high level of satisfaction. Guest Internet products meet the requirements of all hotel franchises for quality and reliability of service.

Guest Internet also provides Cloud support services for IT infrastructure firms that deliver solutions to motels and hotels.

Properties can achieve installation cost savings with Guest Internet network gateway products as one wireless network can be used for both guests and staff with complete isolation, and the network can also support IP phones and IPTV.
