

Internet Hotspot Solutions for Marinas

- ❑ High performance Internet gateways that are simple to install
- ❑ Plug and play: the easy to use wizard speeds installation
- ❑ Custom login page with client branding, choose from 12 backdrops or create your own design
- ❑ Protect with the built-in disclaimer; the legal disclaimer can be edited
- ❑ Seven login options are available
- ❑ Authenticated access uses codes that are generated and managed on the unit
- ❑ A firewall protects the business network from hackers with PCI DSS compliance
- ❑ Master bandwidth control, and individual bandwidth settings for each code
- ❑ Content filtering is available to ensure a family friendly Internet service
- ❑ Monitor Internet utilization through comprehensive reports
- ❑ Access code API for PoS and PMS applications
- ❑ Remote access and configuration
- ❑ Free Cloud management service

Boat owners consider the Internet WiFi Hotspot to be an essential amenity at any marina.

Most marinas already offer some type of wireless Internet service for visitors due to the demand for this service. Some marinas also provide a computer at the main office where visitors can check email. However there are drawbacks.

Marinas owners face risks by offering an open WiFi Hotspot. Risks vary from getting the business computers and PoS hacked, to getting sued for illegal downloading of copyrighted files.

Guest Internet Hotspot gateways have a firewall that is PCI compliant and protects your business computers and PoS from hackers. The P2P blocker is another important feature that prevents visitors sharing copyrighted files, ensuring that there is no risk to the marina owner of copyright lawsuits.

Provide free access for visitors, or use the gateway credit card billing feature to charge for the Internet service through your PayPal® business account. Ensure that the Internet service is shared equally between all the visitors by regulating the bandwidth of each user.
