

Internet Hotspot Solutions for Schools and Colleges

- Low cost Internet gateways that are simple to install
- Plug and play: the easy to use wizard speeds installation
- Custom login page with client branding, choose from 12 backdrops or create your own design
- Protect against lawsuits with the built-in disclaimer; the legal disclaimer can be edited
- Authenticated access uses codes that are generated and managed on the unit; no external RADIUS server is required
- A firewall protects the business network providing PCI DSS compliance
- Master bandwidth control, and individual bandwidth settings for each code
- Content filtering ensures a family friendly Internet service by blocking adult web sites
- Monitor Internet utilization through comprehensive reports
- Access code API for PoS and PMS applications
- Remote access and configuration
- □ Configuration backup and restore

Although Internet access is a must for school curricula the service must be locked down with 'parental controls' that prevent students getting access to adult Websites, or Websites that promote content that is unacceptable within the school environment. Guest Internet gateways provide those 'parental controls'.

It is very important that the school can block peer-to-peer (P2P) file sharing software to ensure that the school is not held responsible for copyright infringement. Data download speeds are also regulated to share the Internet resources between all students.

The Guest Internet gateway protects students from the undesirable parts of the Internet, and protects the school when students try to share copyrighted material.

The school can use the Guest Internet gateway to control access to the Internet. Each student is issued with an access code that is tied to the students computer. The access code determines the time that the student can use the Internet. Reports also show each students Internet usage.

The school can also use the gateway custom login feature to prepare a home page for the school, and advertise events via the login page.

SMALLER SCHOOLS - GIS-R6

Gateway for smaller schools having multiple wireless access points installed

Use Guest Internet gateways with any type of wireless access point. Wireless access

points are installed throughout the premises to ensure good wireless coverage

- Can support up to 200 concurrent users
- Circuits up to 40 Mb/s
- Peer to peer (P2P) illegal file share blocking
- Content filtering, block adult websites

LARGER SCHOOLS - GIS-R10

- Gateway for larger schools having multiple wireless access points installed
- Can support up to 250 concurrent users
- Circuits up to 50 Mb/s
- Peer to peer (P2P) illegal file share blocking
- Content filtering, block adult websites
- Failsafe operation, dual WAN circuits up to 100 Mb/s each, with load sharing and fail-over for high reliability

HIGH SCHOOLS/COLLEGES - GIS-R20

- Gateway for high schools and colleges having multiple wireless access points installed
- Can support up to 500 concurrent users
- Circuits up to 100 Mb/s
- Peer to peer (P2P) illegal file share blocking
- Content filtering, block adult websites
- Failsafe operation, dual WAN circuits up to 100 Mb/s each, with load sharing and fail-over for high reliability

technical skills are required

Simple setup Wizard takes less than 5 minutes

Simple user interface: no complicated program ming is required

We manufacture a range of hotspot products that offer the exact price / performance for every type of school and college. Do you have special requirements for your Internet Hotspot? Our technical support staff will be glad to help you with a solution that meets your specific requirements. We can also provide a custom login page service based on your business web site. Please call our sales staff at 1-800-213-0106 for product and price information. Please see our web site: www.quest-internet.com for product data sheets and manuals.
